To Whom It May Concern

SolAir World Hybrid Air-conditioning system

“We were looking at continuous improvement on efficiency, including energy saving and came this hybrid air-conditioning system which fits perfectly into our objective.

Not to mention the quick follow-up from the staff, the installer workmanship was excellent. Most importantly, the savings in electricity usage is about 50% compared with other inverter air-conditioning system. I would highly recommend this.”

A handwritten signature in blue ink, appearing to read 'Jess Low', written over a printed name and title.
