

Hi Dennis,

We are pleased to share our thoughts on the "SOLAIR World Air conditioning". The decision on choosing the product was definitely right, the Solair Aircon performs much better than traditional aircon that we have used before.

Our customers complimented the coolness and they feel comfortable when they are in our premises. Not only that, our working staff too feels good and enjoys the working environment even through the temperature was set at 24degree Celsius. When we received the monthly utilities bill, we were very impressed with the drastic electrical drop in usage. All these factors have proofed what you have claimed and we would highly recommend this.

I thank you again for recommending this Solair world air conditioning to us and help us saved much more then we have thought.

Regards,

Irwin Ng
