To Whom it May Concern,

Re: SolAir World Hybrid Air-conditioning system

While looking to improve efficiency and saving energy for our operations, we were introduced to SolAir World Hybrid Air-conditioning system. After careful consideration and evaluation, we decided to install the system.

After installing the unit, the extra coolness from this unit makes the office more comfortable at the recommended room temperature setting. Most importantly, we have noticed a tremendous reduction in our electricity consumption without compromising coolness comparing with other inverter system.

The installation team was very professional in providing good advice and workmanship. We would highly recommend SolAir World Hybrid Air-conditioning system to improve energy efficiency and savings.

Yours Sincerely,

Harvest Gaming Pte. Ltd.

Alfred Hwee
Manager
